

# Capital City Politics in Latin America: Democratization and Empowerment

As Latin America's new democratic regimes have decentralized, the regions' capital cities - and their elected mayors - have gained increasing importance. Capital City Politics in Latin America tells the story of these cities: how they are changing operationally, how the empowerment of mayors and other municipal institutions is exacerbating political tensions between local executives and regional and national entities, and how the cities' growing significance affects traditional political patterns throughout society. The authors weave a tapestry that illustrates the impact of local, national, and transnational power relations on the strategies available to Latin America's capital city mayors as they seek to transform their greater influence into desired actions.
