

Modern Military Aircraft (The Aviation Factfile)

Modern Military Aircraft is a comprehensive guide to the worlds fighting aircraft since World War II, from the earliest jet fighters and basic piston-engined bombers, to todays high-tech and stealthy superfighters. Aircraft featured include: the F-86 Sabre, which fought its way to convincing victory over Russias MiG-15 in the worlds first jet-versus-jet battles in Korea; the Grumman F-14 Tomcat, the deadliest fleet fighter ever built, which has played an important part in the conflicts of the late 20th and early 21st centuries; Russias export miracles, the Sukhoi Su-27 and MiG-29, currently in service with air arms across the world in an array of variants; the Lockheed Martin F-35 Lightning II, destined to enter service with many air forces in the coming decades, combining supersonic performance with vertical take-off and landing capability. This book contains detailed features on more than 220 combat aircraft and helicopters from the past 65 years. Each aircraft is covered in detail, with feature boxes outlining its development, technical specifications, performance data, and variants. Unique graphics allow the reader to compare specific features like firepower, troop-carrying capacity, and bomb load to those of other aircraft of the same type.
