

# Portal Tombs in the Landscape: The Chronology, Morphology and Landscape Setting of the Portal Tombs of Ireland, Wales and Cornwall (British Archaeological Reports British Series)

Oxbow says: A detailed study, based on the authors doctoral research, of portal tombs in Ireland, Wales and Cornwall, including a synthesis of previous work on this type of megalithic monument, and original fieldwork. The chapters examine tomb morphology, issues of classification and variants from the ideal portal tomb, finds (lithics, pottery and human bone), and radiocarbon dates. Finally, Kytmanow places the tombs within the context of the landscape, exploring links with other monuments and settlements. Further data, including a catalogue of 225 sites, can be found on a CD.
