

The public administration workbook

This unique workbook engages students in the study of public administration and helps them gain a deeper understanding of the field by providing exercises that expose them to a wide range of practical applications. Connecting theory to practice, a brief theoretical introduction precedes each exercise, explaining why the technique is important and how it is relevant to the study and practice of public administration. Key Features: A participatory approach to the key topics in public administration engages students and provide them with practical experience. Theoretical discussions prior to each exercise root the material in theoretical context and enable students to understand the importance and relevance of the exercise. A detailed Instructors Manual, written by Dennis Dresang, guides instructors with solutions, explanations, and suggestions for using (and modifying) the exercises to fit a variety of course needs. Downloadable datasets and exercises make it easier than ever to assign, submit, and grade assignments electronically.
